

WHEN OPENING YOUR POOL

- ☐ Remove pool cover
- ☐ Clean and vacuum pool
- ☐ Add water to the desired height
- ☐ Test water balance and pH
- ☐ Inspect electrical service, filters, skimmers, drains, ladders, diving boards, plugs, gauges, etc.
- ☐ Clean tiles and skimmer with cleanser
- ☐ Clean and inspect pool deck and area surrounding pool
- ☐ Skim pool water surface and vacuum pool bottom
- ☐ Shock pool water

DAILY MAINTENANCE

- ☐ Skim the surface of the pool to remove any leaves or other debris
- ☐ Check filter to make sure it is functioning properly
- ☐ Clean filter if the water is noticeably dirty
- ☐ Test the water's pH level and chlorine level, and add all necessary chemicals
- ☐ Remove all leaves and other debris from the strainer basket.

WEEKLY MAINTENANCE

- ☐ Clean tiles and walls of the pool and clear all algae that has built up
- ☐ Check the walls and the lining of the pool for any tears, cracks or other signs of wear or damage and repair if necessary
- ☐ Clean the pool deck thoroughly with hose or power washer
- ☐ For saltwater pools, test the salt levels
- ☐ Make sure the water level is high enough and that the pump is functioning correctly
- ☐ If possible, keep pool covered when not in use to prevent evaporation and to keep debris from falling into the pool
- ☐ Check all of the steps, ladders, handrails and other safety equipment in the pool to ensure they are in full working order
- ☐ Remove any debris from the bottom of the pool such as dirt, leaves or other accumulations
